1860 CENSUS INDEX

compiled by
KRATZ INDEXING

copyright 1987

This index has alternative surnames, given names, ages, and places of births. If a surname is known like Dolahyte but the census taker put down Dolahyde then both names are in the index. If the husbands surname varies a little from the wifes or children then the husbands surname is listed both ways.

Not all children with a different surname than the head of household may be listed. Not all children older than 20 years with the same surname as the head of household may be listed.

There is no page 92. There is a page 29A and 29B.

INSTRUCTIONS

This index includes all the heads of household and other people in that household that do not have the same surname as the head of house. This index also includes children over the age of 20 that have the same surname as the head of household. If 2 families are living in the same house with different surnames then only the heads of household are listed unless the children are older than 20 years of age. If a man is 50 years old and a woman 25 years old then she is listed sometimes because she may be the daughter. If a John Brown age 18 is living with a Bill Brown age 24 then John Brown would be listed. Below are some samples.
